

Johan Henkens

6 Princeton Road, Menlo Park, CA 94025
(650) 804-6698 ♦ johan@henkens.com

- ♦ Education
 - M.S. in Computer Science**
University of California, Santa Barbara
Date of Graduation: December 2014, GPA: 3.92
 - B.S. in Computer Science, with High Honors**
University of California, Santa Barbara
Date of Graduation: December 2013, GPA: 3.89
- ♦ Professional Experience
 - Software Development Engineer Intern, Microsoft Corporation**
Bellevue, WA | June 2013 - September 2013
Evaluated profitability of new ad annotation through big data analysis under Bing Monetization. Created SCOPE and C# code to reduce, analyze, and iterate on big data sets as new constraints and goals for the feature were determined.
 - Software Development Engineer Intern, Microsoft Corporation**
Mountain View, CA | June 2012 - September 2012
Redeveloped features for the delivery engine of Microsoft adCenter's Contextual Ads product during a broad engineering redesign. Worked largely independently, communicating between four teams to recreate feature in new C++ and C# codebase.
- ♦ Projects
 - Octopi and LaPlaya**
March 2014 to December 2014 (MS Project)
<https://github.com/ucsb-cs-education/octopi-webapp>
<https://github.com/ucsb-cs-education/laplaya>
Ruby on Rails webapp created to teach 4th and 5th grade students programming and computational thinking concepts. Uses LaPlaya, a fork of Berkley's *Snap! BYOB* block based programming environment. Structured interfaces provide instructions and progress tracking to schools, teachers, and students as they move through a curriculum. Includes work with NodeJS, CoffeeScript, Resque, Redis, Postgres, Javascript, Heroku, and AWS.
 - CS290GChat**
Spring 2013
Created an iPhone Bluetooth chat app with an Objective-C implementation of elliptic curve Diffie-Hellman to provide symmetric key setup needed to encrypt the communication. Used the OpenSSL BIGNUM struct to perform the necessary multiple-precision arithmetic.
- ♦ Interests
 - ♦ Scalable Web Systems
 - ♦ Empowering Education
 - ♦ Streaming Media Systems
